Education

Netaji Subhas University of Technology, New Delhi – B.Tech. in Mechanical Engineering

Aug 2021 – May 2025

Experience

PlatinumRx, Bengaluru

January 2026 – Present

Product Management Intern

- Improved checkout experience across 2 key flows:
 - Mapped 6 cart drop-offs via MS Clarity; revamped UI to surface substitute medicine context inline and added in-cart address review; **improved checkout completion from 32% to 35%**.
 - Identified manual address entry as a drop-off via session recordings; shifted to API-first flow, instrumenting 25 events; **improved address completion from 42% to 49%**.
- Applied Google's E-E-A-T framework across doctor profiles, FAQ, and medicine Q&A pages; added interpage links, doctor-authored content, and social proof; **grew weekly organic sessions from 18k to 24.5k over 5 weeks post-launch**.
- Owned patient testimonials feature end-to-end on PDP; defined collection flow, coordinated with design, marketing, and CRM; **improved PDP conversion from 7.5% to 8.0%**.

CureFit, Gurugram

May 2025 – November 2025

Strategy Intern, Cult.Lux

- Analyzed monthly retention cohorts in Metabase; identified Day 16 as the critical churn window for premium users, which reshaped the retention team's re-engagement sequencing strategy.
- Tracked GTM performance in Metabase, identified drop-off patterns and likely causes; analysis drove the decision to shift outreach to WebEngage and WhatsApp bots.
- Independently benchmarked 5 luxury fitness competitors on unit economics, pricing tiers, and positioning; identified a premium-but-accessible segment gap that was incorporated into Cult.Lux's GTM brief.

Projects

PlanSmart – Scheduled Delivery Feature, Zepto – [Prototype](#)

- Problem:** Less than 10% of Zepto users used scheduled delivery despite making planned grocery purchases regularly.
- Insight:** Scheduled delivery had no visibility or cost incentive at checkout.
- Solution:** Checkout-embedded Schedule & Save toggle validated through 31 user interviews (74% unaware, 58% price-driven).
- Outcome:** Rs. 36/order net contribution via route batching, cutting delivery cost from Rs. 70–90 to Rs. 45–60.

Zenith – AI Career Clarity App – [Portfolio](#)

- Problem:** Early-career professionals often struggle to decide which skills to build for specific roles and cities.
- Insight:** Most edtech platforms recommend courses they sell, which can bias their guidance.
- Solution:** Built an AI-powered career advisor that recommends 3 role-and-city-specific skills and visualizes local demand trends.
- Outcome:** Designed a subscription-based model focused on unbiased career guidance rather than course sales. Built as **Top PM Fellow at NextLeap**, selected from a cohort of 250.

Voice Dictation App – Android, Kotlin, Jetpack Compose

Built to eliminate distraction from manual note-taking during online sessions; real-time transcription via Deepgram Nova-2 WebSocket streaming; distributed as a signed APK, used across 20+ sessions.

Telegram Stock Agent – Python, AI

LLM-powered agent delivering plain-English stock summaries inside Telegram, eliminating context-switching to financial apps; results in under 20 seconds.

Skills

Product: User Research, Funnel Analysis, A/B Testing, Roadmap Prioritization, SEO Optimization, Behavioral Analytics

AI: Prompt Engineering, Context Engineering, LLM Integration, AI Agents, AI Evaluations, Rapid Prototyping, Workflow Automation

Technical & Analytics: System Design, REST APIs, SQL, Product Analytics, Session Analysis, Data Visualization
